OBJECTIVE

Software Engineer Self-motivated , driven and a creative individual with good communication skills and adept at handling all types of personalities in a cooperative way . Passionate about various technologies and proficient in OOP concepts along with considerable experience in creating user interfaces using various technologies.

EDUCATION

<i>Higher Education</i>	<i>May-2021</i>
<i>A B Higher Secondary School , Navsari</i>	Gujarat , India
<ul style="list-style-type: none"><i>Percentile Rank - 87.00</i>	
<i>Bachelor of Technology in Information Technology</i>	<i>May-2025</i>
<i>C.S. Patel , Institute of technology , Anand</i>	Gujarat , India
<ul style="list-style-type: none"><i>Cgpa : 7.92 / 10</i>	

TECHNICAL SKILLS

- | | |
|---------------------------------------|--|
| • Languages : | C/C++, JavaScript, PHP |
| • Frameworks & Libraries : | Mern Stack |
| • Databases : | MongoDB , MySQL |
| • Tools : | Data Structure & Algorithms , Git , Github |

SOFT SKILLS

- TeamWork & Cooperation
- Problem Solving
- Creativity
- Task Planning and Execution

EXPERIENCE

Software Developer	05/2023 - 06/2023
<i>ProjectTree</i>	
<ul style="list-style-type: none">• Worked on various live projects & learn about new sets of technology.• Build different modules of long-term project that used by customers in future.	
Software Developer	05/2024 - 06/2024
<i>Celebal Technologies</i>	
<ul style="list-style-type: none">• Developed and implemented multiple small-scale projects weekly using React.js• Gained hands-on experience with React.js by building dynamic and responsive web applications	

PROJECTS

Real Estate Marketplace Development

- Designed and implemented a modern real estate marketplace using MERN stack
- Integrated advanced features including JWT authentication, Redux Toolkit for state management, Firebase for cloud services, and Google OAuth for user authentication.
- Achieved a comprehensive understanding of the MERN stack through immersive project-based learning, enhancing proficiency in web development and application deployment.

Food Management System

- Led the development of a comprehensive food delivery web application using MERN stack technologies
- Created a visually appealing and easy-to-use interface, ensuring the platform works smoothly on all devices.
- Developed reliable methods for retrieving and managing data to ensure a smooth user experience. Added strong security measures to protect user information and ensure safe transactions.

Online Voting System

- Created a user-friendly and secure online voting system using PHP, MySQL, HTML, and CSS, aiming to make the voting process more accessible and efficient for all eligible voters.
- Implemented user authentication, candidate management, and vote casting functionalities. Ensured accurate vote counting and real-time result display. Focused on data validation, form handling, and error management to enhance security.

CERTIFICATES

- Data Base Management System-NPTEL
- Project Management Foundations
 - It is a course authorized by Project Management Institute and offered through LinkedIn which includes the fundamentals of project management, from establishing project goals and objectives and building a project plan to managing resources and work, meeting deadlines, and closing the project.
- Shaastra X Codechef Programming Tournament
 - It is a coding contest of the IIT- Madras.
- Introduction to Soft skills
 - I learnt about basic soft skills such as how to communicate with peer employees, how to do team work etc. It was arranged by TCS
- Codepie 2.0
 - It is a competitive programming contest which was organized by faculty of technology.
- Introduction to TCP/IP
 - It is a course authorized by Yonsei University and offered through Coursera which includes basics of communication protocols of computer network.
